Digital business & strategy	34
Change management & organizational resilience	36
Corporate strategy 2 : redesigning business model.....	37
Sustainable development & CSR	38
Corporate finance 2 : LBO, mergers & acquisitions.....	39

INTRODUCTION TO THE FRENCH EDUCATION SYSTEM

How does the education system work in France?

The French system might be different than the one in your home institution.

We value the time spent with the teacher and the knowledge you can get from him/her and the amount of time spent in class is larger than the time spent working at home.

Our pedagogical aim is for you to learn as much as you can from your professors. This is the reason why the number of hours per course may seem important.

A French student spends approximately 20 hours a week at school during 10 to 12 weeks in order to obtain 30 ECTS credits. The course load at home will not exceed a normal amount of study time.

IDRAC Business School usually recommends exchange students to choose 30 ECTS credits for one semester, with a minimum suggested of 20 ECTS credits. However, students should directly check with their home universities what their requirements are, as they may differ from what IDRAC Business School recommends.

About the grading system

Subjects taught at IDRAC Business School are graded on a 0 (lower grade) to 20 (higher grade) scale. The passing grade for a subject is 10.

It is usually said that in France “20 is for God, 19 is for the King and 18 is for the President, so 17 is the maximum grade a student can attain”....

In practice, grades higher than 15 are very seldom awarded and 14 is considered very good.

IDRAC Business School Grade Distribution

Grades used in institution (from highest to lowest passing grade)*		Percentage of each grade with respect to the total passing grades awarded	Cumulative percentage of passing grades awarded	Equivalent ECTS grade
From	To			
14.5	20	5%	5%	A
14	14.4	10%	15%	B
13	13.9	35%	50%	C
12	12.9	30%	80%	D
10	11.9	20%	100%	E

** based on the analysis of grades from 3 different academic years, at undergraduate and postgraduate levels – during the graduation year only (3rd and 5th)*

Prerequisites

In the following syllabi, prerequisites are mentioned. Please note that these are not compulsory for exchange students.

LIST OF COURSES¹

Code	STRA 711
Title	Life cycle management & business
Competence Unit	Product Life Cycle 1 (Introduction & development)
Type (compulsory / optional) and cycle (short / 1 st / 2 nd / 3 rd)	Optional, 2 nd cycle

Code	STRA 712
Title	Corporate Strategy 1 : Entrepreneurship
Competence Unit	Product Life Cycle 1 (Introduction & development)
Type (compulsory / optional) and cycle (short / 1 st / 2 nd / 3 rd)	Optional, 2 nd cycle
Year and semester of study	Year 4, Semester 7 (fall)
Number of ECTS credits allocated	2
Learning outcomes	<p>Knowing the different entrepreneurial forms</p> <p>Understand the principle of value proposition through old and new innovative ideas</p> <p>Having sufficient knowledge to be able to start on an entrepreneurial project</p> <p>To be able to take a position in a context, with an idea, a project, with knowledge of the different stakeholders.</p>
Mode of delivery	Face-to-face and team/individual work
Prerequisites and co-requisites (if applicable)	PGE3 MODULES MARKETING ET STRATEGY
Course content	<p>This course is essential for the business plan course and the redesigning business model course. It discusses the theoretical aspects of entrepreneurship. The course will deal with different forms of entrepreneurship in different social categories. Student entrepreneurship and self-entrepreneur status are highlighted and explained to learners.</p> <p>Then we explain the problem of financing the projects and discuss the different types of financing. We focus on the creation and co-creation of value by emphasizing social entrepreneurship. A course session will be devoted to detailing the different entrepreneurial forms. This is in order to help the student to develop an entrepreneurial project.</p> <p>Finally, the teacher insists on the importance of coaching in the success of entrepreneurial projects and the importance of management</p>

Title	Strategic human resources management
Competence Unit	Product Life Cycle 2 (Growth)
Type (compulsory / optional) and cycle (short / 1 st / 2 nd / 3 rd)	Optional, 2 nd cycle
Year and semester of study	Year 4, Semester 7 (fall)
Number of ECTS credits allocated	2
Learning outcomes	<p>Enable students to take a critical distance from the Universalist conception of management by being able to do a systemic or complex analysis of an HRM practice in a given organization.</p> <p>From an entrepreneurial or decision-making perspective, allow them to define an HRM policy (recruitment, training, etc.) to support the company's performance. Understanding the need to take into account the critical and societal dimension of any SHRM decision.</p>
Mode of delivery	Face-to-face and group/individual work
Prerequisites and co-requisites (if applicable)	None
Course content	<p>The course mixes an approach using theoretical grids and business case studies. It first presents the theoretical foundations of SHRM, considers the different types of strategies and HR policies that are commonly associated with them.</p> <p>It uses the Mintzberg typology to understand the choices of organizational design and HRM practices in business models of the "life cycle" type. It complements this analysis with a discovery of the research works on HRM of complexity. These latter practices are often adopted in organizations whose business model is of the "born global" type.</p> <p>In order to validate the continuous assessment, the students must carry out a diagnosis in a company in order to acquire a more practical apprehension of the SHRM principles.</p>
Recommended or required reading	<p>Required reading (data bases) For each diagnosis and if it is available, students should use the Global Sector Analysis on the Xerfi data base (Mylearningbox). Armstrong, M. (2016) Armstrong's Handbook of Strategic Human Resource Management, Kogan Page, 265 p.</p> <p>Recommended reading Dubois, D. & al. Prerequisites and co-requisites (if applicable)	None
Course content	<p>1. To enhance understanding of the communication process in general and of the interpersonal and personal communication processes in particular: students will speak publicly, in both formal and informal contexts.</p> <p>2. Students are asked to participate effectively in discussion: students are placed in small discussion groups throughout the semester. The tasks and discussions in these groups range from in-class writing/presentation workshops to discussions based on class material to exercises performed outside of the classroom. They informally talk and present their opinion in order to help the small group and class discussion. Their performance in these groups is assessed through activity points.</p> <p>3. Analyze and comment on the oral communication of oneself and others: students are required to write a self-critique report following the theoretical and practical issues studied.</p>
Recommended or required reading	<p>Required reading The Interpersonal Communication Book - Glossary of Terms. (2013). [online] Available at : https://quizlet.com/2440140/the-interpersonal-communication-book-glossary-of-terms-flash-cards/, (retrieved 25/09/2017)</p>

Assessment methods and criteria	Continuous assessment (50%) and Report (50%)
Language of instruction	English

Code	ORGA 804
Title	Operation management (lean, yield)
Competence Unit	Product Life Cycle 3 (Maturity)
Type (compulsory / optional) and cycle (short / 1 st / 2 nd / 3 rd)	Optional, 2 nd cycle
Year and semester of study	Year 4, Semester 8 (spring)
Number of ECTS credits allocated	2
Learning outcomes	<ul style="list-style-type: none"> - Intégrer le lien entre le commercial et l'opérationnel. - Savoir réduire les coûts et augmenter les profits. - Adopter les outils d'optimisation Lean et Six
Mode of delivery	Face-to-face and group/individual work
Prerequisites and co-requisites (if applicable)	None
Course content	<p>La première session donne aux étudiants la connaissance au sujet des circulations physiques et d'informations dans une société. Ils découvriront les causes des retards, ou des délais d'écoulements, et connaîtront les actions pour les transformer en circulation efficace et favorisant la réduction du stock.</p> <p>La seconde session permet aux étudiants de se familiariser avec le Six Sigma et d'utiliser les statistiques pour prendre des décisions factuelles dans les sociétés.</p> <p>La troisième session fournit aux étudiants la connaissance et la compréhension des outils utilisés dans le processus Lean. Ainsi les participants peuvent identifier le gaspillage sur leur espace de travail et seront à même de savoir éliminer le gaspillage.</p> <p>Les étudiants verront des démonstrations de l'utilisation et l'application du Lean. Ils appliqueront le concept du Lean dans le comité de direction d'une société qui décide d'améliorer sa performance opérationnelle.</p>

Learning outcomes	<ul style="list-style-type: none"> - Develop an understanding of digital imperatives in a fast-changing environment - Build an understanding of digital strategies' systemic approach in the enterprise's development phases - Know how to identify the analytics and efficiency metrics (KPIs) of digital channels
Mode of delivery	Face-to-face and group/individual work
Prerequisites and co-requisites (if applicable)	<p>The following prerequisites are needed (in order to comprehend the course content including the information age, marketing in the online environment, online consumer behaviour, concepts of ebusiness, ethics and governance):</p> <ul style="list-style-type: none"> - Marketing Fondamental - Introduction au Management
Course content	<p>The Digital module is a high quality and flexible learning programme designed to help students gain access to new skills and knowledge, as a means to improve employability. Better understanding of the challenges and opportunities of digital imperatives can reduce the direct costs of many business ventures. If the digital context is well understood and deployed, it can strengthen relationships with individual customers and stakeholders, and thus enhance the reputation, performance and profitability of the business.</p> <p>Through individual learning, class discussion and assessment activities, this module is designed to support the professional development of the students, and secondly to encourage innovation and further reflection. Its key elements of business thinking and cultural awareness will help students to look at opportunities and challenges in a wider context - and to explore how technology can be used to effectively support business activities and community-oriented activities.</p>
